

LUBRICANTS

LUBRICANT ALB-591

Lubricant ALB-591 is conceived and designed to keep both in good condition and working order not only the machinery for the meat industry (such as clippers), but also food processing machinery in general.

Taking into account the strict regulations of health and hygiene which apply in the Food industry, Lubricant ALB-591 is officially approved and meets all the EU and USA requirements and food regulations.

Lubricant ALB-591 is available in two types of containers:

- 5 liters can for the air-conditioning unit
- 400 ml spray for the protection of materials and pieces.

We distribute our products in more than 100 countries covering the five continents and competing with success in the most demanding markets.

Our aim is to keep increasing our presence in all markets by offering high quality products at very competitive prices.
