

# K4-120

## K4-120 H-3200

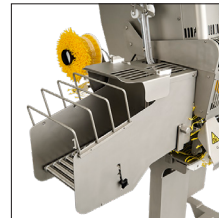

- Double automatic clipper connected to filler.
- It can clip calibers from 40 to 120 mm diameter (ask for larger calibers of plastic casing).
- It can work with any kind of artificial casing (plastic, collagen, fibrous).
- It can be connected to any filling machine brand.
- Electro-pneumatic operation controlled by PLC with multiple possibilities of adjustments.
- Minimum maintenance.
- Robust design with stainless steel materials.
- Wide range of accessories available.

Clip on spool accessory for a faster production.

Movable stuffing tube to reduce the casing breakages and to center the clip.

Roller tray for a better product output.

Automatic loop device.
